President's Corner

I want to thank New Mexico's mathematics teachers for their response to our spring newsletter. Many people have joined NMCTM in the past month, thanks to you, our members, who are getting the word out about NMCTM. Please keep getting the word out about NMCTM and recruit your colleagues to join.

I am also happy to announce that NMCTM is launching a listserv for its membership this spring. The goal of the listserv is to provide teachers from across the state with opportunities to share their ideas about best practices. To participate in the listserv, please renew your NMCTM membership and be sure to

include your email address. The membership form is provided below. Mail in your membership dues (only \$7 for renewals and \$10 for new members) to Pam Abreu, 714 Myrtle Avenue, Las Vegas, NM 87701 (abreupam@hotmail.com).

We are sponsoring our annual conference jointly with the New Mexico Science Teachers' Association (NMSTA) on December 4-6, 2003 in Las Cruces. Our goal is to have a high quality conference that will be of great benefit and interest to New Mexico's teachers. For this to happen, we need you to present and/or recruit your colleagues to present at the

fall conference. You could present a model lesson, discuss professional development activities that you and your colleagues are engaged in, share strategies to improve student achievement at your school or whatever. You will find the presenter's form on the back of this page. The conference registration fee will be waived for NMCTM members who present at the fall conference. To recruit novice teachers to join us in Las Cruces at the conference, we will also waive the conference registration fee for preservice teachers. Visit our website for updates.
